ABOUT JEJU ISLAND

Jeju Island is the foremost island in Korea in terms of size and unique climate. The island province consists of Jeju and its adjacent islands. Geographically, its relative isolation from the mainland resulted in a unique dialect and lifestyle of its own. The natural beauty of Hallasan Mountain and the surrounding sea make Jeju an ideal resort island. In recent years, Jeju has been awarded multiple times by global organizations. The island contains the natural World Heritage Site Jeju Volcanic Island and Lava Tubes. Jeju Island is UNESCO's only triple-crown winner for World Natural Heritage, Global Geopark, and Biosphere Reserve. It is also renowned for its beautiful, pristine environment and has been designated as one of the New 7 Wonders of Nature. With the 21st century's arrival, Jeju Island is transforming itself into irreplaceable tourist area.

VENUE 'ICC JEJU'

APMC 2025 will be held at the International Convention Center Jeju (ICC JEJU) in Jeju, an island designated as a UNESCO World Natural Heritage site. ICC JEJU is located in the Jungmun Tourist Complex with the cobalt-blue Northern Pacific stretching on the south and towering Hallasan Mountain in the north. Spreading over an area of more than 5,000m², the world-class convention center is a 7-story building. Artfully blending tourist resources and convention facility, this resort-style convention center is fully equipped for international meetings of any scale and provides professional logistic support in events hosting.
